Research Letters

γ-*N*-Methylasparagine in phycobiliproteins from the cyanobacteria *Mastigocladus laminosus* and *Calothrix* (FEB 05039) *R. Rümbeli, F. Suter, M. Wirth, W. Sidler, H. Zuber* 1

Co-evolution of base composition and codon usage in *Xenopus laevis* and human globin genes with long-range DNA organization of their genome (FEB 05006) *J. Moreau, K. Scherrer* 3

Differential response of the human hepatoma-derived cell line HA22T/VGH to polypeptide mitogens (FEB 05036) *M. Clementi, I. Testa, A. Festa, P. Bagnarelli, C. Chang, G. Carloni* 11

Recombinant human B cell stimulatory factor 2 (BSF-2/IFN-β2) regulates β-fibrinogen and albumin mRNA levels in Fao-9 cells (FEB 05045) *T. Andus, T. Geiger, T. Hirano, H. Northoff, U. Ganter, J. Bauer, T. Kishimoto, P.C. Heinrich* 18

Synthetic diacylglycerols induce a rise of quin2-detectable free intracellular calcium in human platelets (FEB 05044) *C. Bruns, C. Schächtele, D. Marmé* 23

Volatile anesthetics depress the depolarization-induced cytoplasmic calcium rise in PC 12 cells (FEB 05040) *H.G. Kress, H. Eckhardt-Wallasch, P.W.L. Tas, K. Koschel* 28

Activation of wheat embryo calcium-regulated protein kinase by unsaturated fatty acids in the presence and absence of calcium (FEB 05043) *A. Lucantoni, G.M. Polya* 33

Secondary structure of the variant surface glycoproteins of trypanosomes (FEB 05031) *F. Jähnig, R. Bülow, T. Baltz, P. Overath* 37

Nucleotide sequence of a rice glutelin gene (FEB 05047) *F. Takaiwa, H. Ebinuma, S. Kikuchi, K. Oono* 43

Biosynthesis and activity of DNA polymerase throughout the mitotic cycle of *Physarum polycephalum* (FEB 05037) *A.M. MacNicol, G.R. Banks, R.A. Cox* 48

Rat plasma α_1-inhibitor$_3$ binds to receptors for α_2-macroglobulin (FEB 05029) *J. Gliemann, L. Sottrup-Jensen* 55

Quantitative determination of virus-membrane fusion events: Fusion of influenza virions with plasma membranes and membranes of endocytic vesicles in living cultured cells (FEB 05050) *O. Nussbaum, A. Loyter* 61

A novel 60-kDa smooth muscle protein that binds filamin-actin filament complex (FEB 05051) *S. Maekawa, H. Sakai* 68

α-Actinin and spectrin have common structural domains (FEB 05052) *V.-M. Wasenius, O. Närvänen, V.-P. Lehto, M. Saraste* 73

The effect of myosin light chain phosphorylation on the actin-stimulated ATPase activity of myosin minifilaments (FEB 05048) *D.I. Levitsky, L.A. Shuvalova, B.F. Poglazov* 77

Detection of multiple forms of $G_{i\alpha}$ in HL60 cells (FEB 05042) *P.M. Murphy, B. Eide, P. Goldsmith, M. Brann, P. Gierschik, A. Spiegel, H.L. Malech* 81

The primary structure of iron superoxide dismutase from *Escherichia coli* (FEB 05054) *M.E. Schininà, L. Maffey, D. Barra, F. Bossa, K. Puget, A.M. Michelson* 87

Recombinant γ-interferon stimulates iodide uptake and cyclic AMP production by the FTRL$_5$ thyroid cell line (FEB 05058) *A.P. Weetman* 91

Are Ca^{2+} channels in neutrophils activated by a rise in cytosolic free Ca^{2+}? (FEB 05049) *P.E. Nasmith, S. Grinstein* 95

Identification of free radicals in myocardial ischemia/reperfusion by spin trapping with nitrone DMPO (FEB 05041) *C.M. Arroyo, J.H. Kramer, B.F. Dickens, W.B. Weglicki* 101

Recycling of epidermal growth factor in A431 cells (FEB 05060) *L.V. Teslenko, E.S. Kornilova, A.D. Sorkin, N.N. Nikolsky* 105

Induction of protein synthesis in response to ultraviolet light, nalidixic acid and heat shock in the cyanobacterium *Phormidium laminosum* (FEB 05061) *P. Nicholson, R.W. Osborn, C.J. Howe* 110

Rapid formation of secondary structure framework in protein folding studied by stopped-flow circular dichroism (FEB 05055) *K. Kuwajima, H. Yamaya, S. Miwa, S. Sugai, T. Nagamura* 115
Activation and inhibition of the calcium gate of sarcoplasmic reticulum by high-affinity ryanodine binding (FEB 05062) *W. Hasselbach, A. Migala* 119
Fructose 2,6-bisphosphate and the control of the energy charge in higher plants (FEB 05063) *E. Mertens, E. Van Schaftingen, H.-G. Hers* 124
Family of Na^+,K^+-ATPase genes: Intra-individual tissue-specific restriction fragment length polymorphism (FEB 05064) *E.D. Sverdlov, N.E. Broude, V.E. Sverdlov, G.S. Monastyrskaya, A.V. Grishin, K.E. Petrukhin, N.S. Akopyanz, N.N. Modyanov, Yu.A. Ovchinnikov* 129
Sequence comparison of γ-crystallins from the reptilian and other vertebrate species (FEB 05067) *S.-H. Chiou, W.-P. Chang, C.-H. Lo, S.-W. Chen* 134
Identification of a UDP-Gal:β-galactoside β1→3-galactosyltransferase in the albumen gland of the snail *Lymnaea stagnalis* (FEB 05066) *D.H. Joziasse, H.C.M. Damen, M. de Jong-Brink, H.T.Edzes and D.H. Van den Eijnden* 139
Two additional bacteriophage-associated glycan hydrolases cleaving ketosidic bonds of 3-deoxy-D-*manno*-octulosonic acid in capsular polysaccharides of *Escherichia coli* (FEB 05069) *F. Altmann, L. März, S. Stirm, F.M. Unger* 145
Primary structure of the acidic carbohydrate chain of hemocyanin from *Panulirus interruptus* (FEB 05070) *J.A. van Kuik, J. Breg, C.E.M. Kolsteeg, J.P. Kamerling, J.F.G. Vliegenthart* 150
Possible involvement of eicosanoids in the actions of sympathetic hepatic nerves on carbohydrate metabolism and hemodynamics in perfused rat liver (FEB 05038) *M. Iwai, K. Jungermann* 155
Is there a Root effect in *Xenopus* hemoglobin? (FEB 05059) *M. Brunori, A. Bellelli, B. Giardina, S. Condo, M.F. Perutz* 161
Evolution of an inducible penicillin-target protein in methicillin-resistant *Staphylococcus aureus* by gene fusion (FEB 05065) *M.D. Song, M. Wachi, M. Doi, F. Ishino, M. Matsuhashi* 167
A modified nicotinic acetylcholine receptor lacking the 'ion channel amphipathic helices' (FEB 05053) *B. Roth, B. Schwendimann, G.J. Hughes, S.J. Tzartos, T. Barkas* 172
Repressor gene, *blaI*, for *Bacillus licheniformis* 749 β-lactamase (FEB 05057) *N.J. Nicholls, J.O. Lampen* 179

FEBS News

FEBS Officers/General Secretaries 185

Notes to Authors 187

Commentary-Hypothesis

Unusual 5 S ribosomal RNAs: An analysis of individual segments can reveal phylogenetic relatedness (FEB 05076) *N. Delihas* 189

Research Letters

Variations with position of replication errors due to exonuclease warm-up (FEB 05075) *P.J. Lecomte, J. Ninio* 194
The phosphorylation at Thr 124 of simian virus 40 large T antigen is crucial for its oligomerization (FEB 05074) *M. Montenarh, D. Müller* 199
Specific loss of LHCII phosphorylation in the *Lemna* mutant 1073 lacking the cytochrome b_6/f complex (FEB 05073) *A. Gal, Y. Shahak, G. Schuster, I. Ohad* 205
Regulation of thylakoid protein phosphorylation by high-energy-state quenching (FEB 05078) *K. Oxborough, P. Lee, P. Horton* 211
Stimulation of thylakoid energization and ribulose-bisphosphate carboxylase/oxygenase activation in *Arabidopsis* leaves by methyl viologen (FEB 05072) *M.E. Salvucci, A.R. Portis jr, U. Heber, W.L. Ogren* 215

Electric field effect on absorption spectra of reaction centers of *Rb. sphaeroides* and *Rps. viridis* (FEB 05086) H.P. Braun, M.E. Michel-Beyerle, J. Breton, S. Buchanan, H. Michel 221
Subcellular localization of a PhoE-LacZ fusion protein in *E. coli* by protease accessibility experiments reveals an inner-membrane-spanning form of the protein (FEB 05071) *J. Tommassen, T. de Kroon* 226
2,3-Bisphosphoglycerate inhibits ATP-stimulated proteolysis (FEB 05083) *E. Roche, F. Aniento, E. Knecht, S. Grisolía* 231
Mast cell activation – a receptor-independent mode of substance P action? (FEB 05091) *H. Repke, M. Bienert* 236
The activation of the periplasmic (NiFe) hydrogenase of *Desulfovibrio gigas* by carbon monoxide (FEB 05080) *Y.M. Berlier, G.D. Fauque, J. LeGall, P.A. Lespinat, H.D. Peck jr* 241
A comparison between the multiline EPR signals of spinach and *Anacystis nidulans* and their temperature dependence (FEB 05081) *R. Aasa, L.-E. Andréasson, G. Lagenfelt, T. Vänngård* 245
Age-dependent deamidation of chicken αA-crystallin (FEB 05077) *C.E.M. Voorter, E.S. Roersma, H. Bloemendal, W.W. de Jong* 249
The amplified P-signal, an extremely photosensitive light scattering signal from rod outer segments, which is not affected by pre-activation of phosphodiesterase with Gα-GTP-γ-S (FEB 05084) *R. Wagner, N.J.P. Ryba, R. Uhl* 253
Crystallization of reaction center I of photosynthesis: Low-concentration crystallization of photoactive protein complexes from the cyanobacterium *Synechococcus* sp. (FEB 05082) *I. Witt, H.T. Witt, S. Gerken, W. Saenger, J.P. Dekker, M. Rögner* 260
Control of ATP hydrolysis in chloroplasts (FEB 05087) *H. Strotmann, S. Kleefeld, D. Lohse* 265
Respiratory control in the glucose perfused heart: A ^{31}P NMR and NADH fluorescence study (FEB 05110) *L.A. Katz, A.P. Koretsky, R.S. Balaban* 270
Glycogen synthesis from pyruvate in the periportal and from glucose in the perivenous zone in perfused livers from fasted rats (FEB 05079) *H. Bartels, B. Vogt, K. Jungermann* 277
8-Bromoguanosine 3′:5′-cyclic monophosphate decreases intracellular free calcium concentrations in cultured vascular smooth muscle cells from rat aorta (FEB 05111) *H. Kai, H. Kanaide, T. Matsumoto, M. Nakamura* 284
Arachidonic acid-induced release of calcium in permeabilized human neutrophils (FEB 05112) *L. Beaumier, N. Faucher, P.H. Naccache* 289
UDP-L-arabinose-hydroxyproline-*O*-glycosyltransferases in *Volvox carteri* (FEB 05027) *R. Günther, E. Bause, L. Jaenicke* 293
Phenylhydrazine as probe for cofactor identification in amine oxidoreductases: Evidence for PQQ as the cofactor in methylamine dehydrogenase (FEB 05108) *R.A. van der Meer, J.A. Jongejan, J.A. Duine* 299
Effects of platelet-activating factor on conversion of angiotensin I to II (FEB 05056) *H. Kawaguchi, H. Yasuda* 305
Effects of Ca^{2+}, theophylline and promethazine on protein phosphorylation in intact cells of rabbit ileum: Correlation with active Na and Cl absorption (FEB 05092) *G.W.G. Sharp, C. Hannah-White, M. El-Sabban, M.E. Cohen and M. Donowitz* 309
Gangliosides stimulate dome formation in cultured canine kidney epithelial cell line (MDCK) (FEB 05095) *N. Rodrig, T. Osanai, M. Iwamori, Y. Nagai* 315
^{1}H NMR and CD evidence of the folding of the isolated ribonuclease 50–61 fragment (FEB 05093) *M.A. Jiménez, J.L. Nieto, J. Herranz, M. Rico, J. Santoro* 320
S-configuration of (+)-primaquine by X-ray analysis of the urea obtained with *R*-(+)-1-phenylethylisocyanate (FEB 05107) *Q.-S. Yu, A. Brossi, J.L. Flippen-Anderson* 325
Regiospecific oxygenations during ring cleavage of a secondary metabolite, 3,4-dimethoxybenzyl alcohol catalyzed by lignin peroxidase (FEB 05085) *M. Shimada, T. Hattori, T. Umezawa, T. Higuchi, K. Uzura* 327
Methylation of the enhancer region of avian sarcoma virus long terminal repeat suppresses transcription (FEB 05088) *R.V. Guntaka, S. Gowda, H. Wagner, D. Simon* 332

In vitro evidence that the coat protein is the programming factor in alfalfa mosaic virus-induced RNA synthesis (FEB 05109) *C.J. Houwing, E.M.J. Jaspars* 337
The interaction of ferredoxin-linked sulfite reductase with ferredoxin (FEB 05097) *M. Hirasawa, J.M. Boyer, K.A. Gray, D.J. Davis, D.B. Knaff* 343
A stopped-flow study of the reaction of cytochrome *c* peroxidase with hydroperoxides (FEB 05096) *C. Balny, H. Anni, T. Yonetani* 349
Glutathione peroxidase and oxidative hemolysis in trout red blood cells (FEB 05104) *G. Falcioni, G. Cincolà, M. Brunori* 355
The phorbol ester, TPA, increases transepithelial epidermal growth factor flux (FEB 05105) *J.M. Mullin, M.T. McGinn* 359
Immunocytochemical localization of protein kinase C in resting and activated human neutrophils (FEB 05113) *E. Deli, Z. Kiss, E. Wilson, J.D. Lambeth, J.F. Kuo* 365
Perivenous localisation of Na-dependent glutamate transport in perfused rat liver (FEB 05116) *P.M. Taylor, M.J. Rennie* 370
Sub-compartmentation of the 'cytosolic' glucose 6-phosphate pool in cultured rat hepatocytes (FEB 05106) *B. Christ, K. Jungermann* 375
Fibronectin-binding 36 kDa protein in human fibroblasts (FEB 05103) *E.-M. Salonen, A. Vaheri* 381
On an Mg^{2+}-dependent interaction of actin with glyceraldehyde-phosphate dehydrogenase: The fundamental role of KCl in the organization of F-actin (FEB 05099) *V. Lanzara, E. Grazi* 387
Calcium-sensitive non-muscle α-actinin contains EF-hand structures and highly conserved regions (FEB 05102) *A. Noegel, W. Witke, M. Schleicher* 391
Isolation of two 67 kDa calcium-binding proteins from pig lung differing in affinity for phospholipids and in anti-phospholipase A_2 activity (FEB 05114) *J. Fauvel, P. Vicendo, V. Roques, J. Ragab-Thomas, C. Granier, I. Vilgrain, E. Chambaz, H. Rochat, H. Chap, L. Douste-Blazy* 397
Location and sequence characterization of the major phosphorylation sites of the high molecular mass neurofilament proteins M and H (FEB 05101) *N. Geisler, J. Vandekerckhove, K. Weber* 403
A new carbene based heterobifunctional reagent: Photochemical crosslinking of aldolase (FEB 05117) *R.M. Mogre, H.F. Batliwala, P.S.R. Anjaneyulu, A.K. Lala* 408
Isolation and sequence analysis of a cDNA clone encoding the entire catalytic subunit of a type-2A protein phosphatase (FEB 05090) *O.B. da Cruz e Silva, S. Alemany, D.G. Campbell, P.T.W. Cohen* 415
Hormone (pheromone) processing enzymes in yeast: The carboxy-terminal processing enzyme of the mating pheromone α-factor, carboxypeptidase yscα, is absent in α-factor maturation-defective *kex1* mutant cells (FEB 05046) *J.-C. Wagner, D.H. Wolf* 423
Trypanosomatid hydrogen peroxidase metabolism (FEB 05098) *P.G. Penketh, W.P.K. Kennedy, C.L. Patton, A.C. Sartorelli* 427
